

ADVENTURES
in good company

ALASKA: FROM FAIRBANKS TO ANCHORAGE

PACKING LIST

FOOTWEAR

- 1 pair light to mid-weight hiking boots. Be sure they fit comfortably, without constriction, when you are wearing one liner sock and one hiking sock.
- 1 pair comfortable shoes to wear when we're not hiking: athletic shoes, Chaco/Teva/Keen sandals
- 1 pair of flip-flops or sandals for the hot springs
- 1-2 pair thin liner socks: silk or synthetic equivalent (optional.)
- 2-3 pairs hiking socks: wool or synthetic equivalent. **Do not skimp on socks.**

CLOTHING

- 1-2 pair lightweight, quick-drying hiking pants (supplex/nylon/blend). Zip offs are a good option.
- 1-2 pair lightweight long underwear top and bottoms: silk, wool or synthetic equivalent (Capilene, MTS, or polypropylene)
- 2 lightweight long-sleeve shirts: one quick-drying button up is recommended
- 1 medium-weight top layer: wool or fleece vest/shirt/pull-over or synthetic equivalent
- 1 warm fleece jacket
- 1 rain parka and rain pants: a waterproof/breathable fabric like Gore-tex is preferable. Partial or full length leg zippers are great for easily putting your pants on over your shoes or boots.
- 1- 2 pair shorts or ¾ pants: quick drying nylon shorts work well.
- 3 t-shirts or short-sleeved shirts (synthetic or lightweight wool are recommended)
- 1 warm hat/buff and gloves: wool or fleece.
- 1 wide-brimmed hat or baseball cap for rain, sun and high fashion
- 1 Swimsuit for the hot springs
- Underwear/nightwear
- Comfortable clothes to wear in our hotels, out to dinner, etc. Cotton is fine for these.

ESSENTIALS

- Bandanna
- 1 one-quart water bottle or hydration system
- Insect repellent
- Sunscreen and lip balm with at least SPF 15
- Head net for mosquitoes
- 1 day pack (lined with a garbage bag or with a pack cover) large enough to hold your supplies for the day
- Ear plugs and eye mask (recommended)
- Trekking poles (highly recommended)
- Sunglasses with case and retention strap
- 1 Tupperware/plastic sandwich box

TOILETRIES (small everything)

- Medium sized towel (like a PackTowl)
- Toilet paper; tampons or pads in Ziploc bags
- Biodegradable soap, toothbrush, paste, dental floss, lotion, extra contact lenses/glasses, if you wear them. Please limit the scented items you bring, as we will be in bear country!

ADVENTURES
in good company

___ Personal “patch kit”: band aids, ibuprofen, moleskin and Compeed (blister band aids), personal medications, if any. **Individuals allergic to insect stings must bring an epi-pen.** Please consult your physician.

OPTIONAL PERSONAL GEAR

- ___ Watch: water resistant
- ___ Small games or deck of cards
- ___ Extra sunglasses w/Chums (eyeglass retention straps)
- ___ Camera, film/memory card, and extra batteries
- ___ Book(s), notebook, journal and pen/pencil
- ___ National Park Pass (annual, golden, or military). These passes may entitle you to additional amenities/perks at parks.
- ___ Binoculars
- ___ Pocket knife
- ___ Your favorite snack(s)
- ___ Waterproof camera bag

NOTES ON PACKING

Adventures in Good Company's packing list includes items to help you be prepared for the various activities and conditions. It is not personalized, so please add the items that you require to travel safely and comfortably but remember – less is better! You may not use everything you bring; however, you need to come prepared for all possible weather. At the same time, you must be able to carry your own luggage, sometimes up and downstairs. Bringing a duffel bag or soft-sided suitcase with wheels, rather than a hard-sided suitcase, is easier for packing into the vans that will be transporting our luggage. **As space for luggage on our trips is limited, please do not overpack!**

Daypacks: You will need a daypack that is large enough to hold the following items: 1 liter of water, rain gear, lunch/snacks (for the day), warm layer (fleece pullover or vest), lightweight gloves, warm hat and any other desired personal items such as camera, journal, etc. We recommend a daypack with a capacity of between 1800 and 2400 cubic inches and preferably with a hip belt, padded shoulder straps and ‘lifters’, all of which will make your pack much more comfortable. If you’re not sure if your pack is large enough, try packing it with everything you need for the day.

Footwear: Well-fitting, sturdy hiking boots are very important to your safety and enjoyment. If you plan to buy new boots, break them in by wearing them as much as possible and taking some short hikes before your trip. For general trekking/hiking there are many choices in both materials and styles of boots. Your choice will depend on the environment you will be hiking as well as your personal preferences and physical condition of your feet and ankles. Boots can be made of leather, nubuck leather, synthetic materials or a combination and come in low, mid or ankle cut styles. For general trekking/hiking we recommend low/mid-height height, lightweight/midweight hiking boots/shoes with Vibram or Vibram type soles. Please note: If you have weaker ankles or are recovering from an ankle injury consider either the mid-height or the ankle height boots. Remember to waterproof your boots before the trip. (Even boots billed as ‘waterproof’ still need to be treated with a waterproofing product – it’s the interior lining that is actually the ‘waterproof’ part of the boot, not the exterior.)

Personal First Aid Kit: We recommend bringing a small first aid kit with the following items: blister and/or foot remedies for blisters, hot spots, etc. (band aids/Compeed/moleskin/personal choice), personal prescription medications, over the counter medications for common ailments (respiratory/colds, stomach issues, sore muscles/joints). Your AGC guide will have a first aid kit as well but if you already know what works for you it’s best to have that with you.

ADVENTURES
in good company

Clothing: All clothing for active wear should be made from synthetic/synthetic blends, down/down blends or wool/wool blends. NO COTTON for your activewear. The clothing listed on the packing list has been chosen for your specific trip conditions and for its versatility for layering. Layering is the most practical and efficient method of insulating the body. Several layers of varied weight materials provide better insulation than one thick layer of clothing. Also, adding or subtracting layers allows you to adjust to the temperature at your particular level of activity.

Rain Gear: You will need a parka or jacket made of a coated nylon or a waterproof/breathable fabric like Gore-tex, HellyTech, Membrane, H2No, or Ultrex. Be sure it keeps water out. Before making this important purchase, be sure that it fits you properly. It should be large enough to fit over all your layers. In particular, the hood needs to be effective. It should shield your face from the rain and turn with your head. Movement of your arms must not interfere with the hood. Put on your daypack; can you still raise your arms? Lastly, the wind/rain pants. They should be comfortable, allow enough room for your layers, and permit free movement of your legs (for example, can you crouch comfortably?). Partial or full-length leg zippers are useful for easily putting your pants on over your boots.

Trekking Poles: Trekking poles are essential for this trip. Trekking poles contribute to your safety by improving your balance and stability, and to your health by saving stress on your hips and knees. If you are not familiar with trekking poles, [click here to read this blog post](#) that addresses the most commonly asked questions.

If you are purchasing trekking poles for your trip please make sure they meet the following guidelines:

1. Height of the poles can be adjusted
2. They have an upright (as opposed to cane-like) handle
3. Have wrist straps that can be adjusted.

**Thanks for reading.
Happy hiking!**
