

# PACKING LIST – ON THE CAMINO DE SANTIAGO

## FOOTWEAR

- 1 pair of lightweight hiking boot/shoes: boots; they should be well broken in and comfortable
- 1 pair of comfortable walking shoes, such as athletic shoes or Teva sandals
- 3-4 pairs of socks (2 should be wool/synthetic and quick drying)

## CLOTHING

- 1 - 2 pairs of comfortable long pants
- 2 - 3 pairs of shorts: one pair could be a quick-drying nylon (see notes at bottom of packing list)
- 1 - 2 lightweight, light-colored, long-sleeved shirt to protect you from the sun
- 2 - 3 T-shirts or sleeveless shirts (make sure they still protect your upper arms from strap-rub while hiking)
- 1 polar fleece jacket or wool sweater
- 1 rain jacket or poncho and rain pants
- Underwear/nightwear
- 1 wide-brimmed hat or baseball hat for sun
- 1 – 2 changes of casual clothes to wear at end of day and out to dinner
- Vest for layering (fleece, or nylon, optional)

## EQUIPMENT/ESSENTIALS

- 1 daypack, 1 pack cover or large plastic bag to line backpack for waterproofing
- Trekking Poles with tip covers (highly recommended for this trip)
- 2 liters water carrying capacity (water bottle or hydration system)
- Passport and a photocopy of your passport**
- Sunscreen and lip block with SPF of at least 15
- Small stone from home (for ritual)
- Sunglasses (100% UV blocking) and retention strap
- Headlamp/small flashlight
- Watch, travel alarm
- Electric plug adaptor type C (plug with two round pins, see notes below)

## TOILETRIES (small everything)

- Toothbrush, toothpaste, dental floss, shampoo, contact lens paraphernalia (bring extras), sanitary supplies, soap, shampoo, washcloths (these are often not provided in Europe)
- Personal first aid/patch kit (Ex: Band-Aids, 1 safety pin, moleskin, blister bandages like Compeed, ibuprofen, and any personal medications)

**Please note: Individuals who have had or have the potential for a severe allergic reaction to insect stings, specific foods or medications must bring an epi-pen. Please consult your physician and tell your guide.**

## OPTIONAL (not required, personal preference)

- Camera (extra battery and extra memory card if you like taking a lot of photos)
- 10 ft light cord and 4-6 clothespins, detergent
- Book, notebook, journal, pencil/pen
- 1 or 2 bandannas and/or Buff-type neck gaiter
- Folding umbrella
- Short gaiters (Ex: Dirty Girl gaiters)
- Washcloth, conditioner and lotion (these are not available at all hotels)
- Small sandwich container (if you purchase your lunch and want to carry it with you to our stop)
- Earplugs and eye mask (for plane and in case of street noise at some hotels)
- Light gloves and ear-warmer or buff if you tend to get cold
- Clothing switch out: consider switching 1 pair of shorts for a hiking shirt or capri length pants
- Light foldable shoulder bag, big enough for shoes/small items (to facilitate possible access during our rest stops) with

name tag

\_\_ Electric convertor for 220V if you bring any appliances that do not convert automatically

## Notes on Packing

Adventures in Good Company's packing list includes items to help you be prepared for the various activities and conditions. It is not personalized, so please add the items that you require to travel safely and comfortably but remember – less is better! You may not use everything you bring; however, you need to come prepared for all possible weather. At the same time, you must be able to carry your own luggage, sometimes up and downstairs. Bringing a duffel bag or soft-sided suitcase with wheels, rather than a hard-sided suitcase, is easier for packing into the vans that will be transporting our luggage. **As space for luggage on our trips is limited, please do not overpack!**

**Daypacks:** Your daypack should be large enough to hold the following items: 1 – 2 liters of water, rain gear, lunch/snacks (for the day), sunscreen, warm layer (fleece jacket or vest), personal first aid kit, and personal items such as camera, etc. We recommend a daypack with a capacity of between 1400 and 1700 cubic inches with a hip belt, padded shoulder straps, and 'lifters'. Line your daypack with a durable plastic bag to keep your belongings dry, or have an elasticized pack cover that fits snugly over it. Before you leave home check to be sure that it is comfortable to wear all day and has sufficient space for all of your items. **Note: Fanny-packs and hydration packs are not large enough to hold all of the items you will need for the day.**

**Footwear:** Well-fitting, sturdy boots or trail shoes are very important to your safety and enjoyment. If you plan to buy new boots, break them in by wearing them around town and taking some short hikes *before* your trip. For general hiking, lightweight or midweight cordura or leather boots with a Vibram sole work well. If you have weak ankles or are recovering from an ankle injury, get boots that come above the ankle– you'll find that this will give you more support in uneven or slippery terrain. Remember to waterproof your boots before the trip. Even boots billed as 'waterproof' need to be treated with a waterproofing product.

**Personal First Aid Kit:** Bring a small first aid kit with familiar medicine and first aid supplies you might need. Recommendations include the following: blister or foot remedies like moleskin, Compeed, blister bandages, or similar, a small roll of duct tape (always useful!), remedies for respiratory ailments, stomach ailments, sore muscles or joints. The guides will have a first aid kit but having what you know works well for you is a good idea.

**Clothing:** The clothing listed on the packing list has been chosen for your specific trip conditions and for its versatility for layering. NO COTTON for your activewear! It should all be made from synthetic/synthetic blends, down/down blends or wool/wool blends. Layering is the most practical and efficient method of insulating the body. Several layers of varied weight materials provide better insulation than one thick layer of clothing. Also, adding or subtracting layers allows you to adjust to the temperature at your particular level of activity.

**Rain Gear:** You will need a parka or jacket made of a coated nylon or a waterproof/breathable fabric like Gore-tex, HellyTech, Membrane, H2No, or Ultrex. **Be sure it keeps water out.** Before making this important purchase, be sure that it fits you properly. It should be large enough to fit over all your layers. In particular, the hood needs to be effective. It should shield your face from the rain and turn with your head. Movement of your arms must not interfere with the hood. Put on your daypack; can you still raise your arms? Your wind/rain pants should be comfortable, allow enough room for your layers, and permit free movement of your legs (for example, can you crouch comfortably?). Partial or full-length leg zippers are useful for easily putting your pants on over your boots. An inexpensive plastic poncho will both leak and tear easily and is not recommended.

**Hydration:** Being able to easily access your water without assistance, so that you can drink frequently, is important to your safety and enjoyment. One method is to have a water bottle attached to your waist strap. Another option is to use a **HYDRATION SYSTEM** such as CamelBak, Platypus, and MSR bladder bags, which are collapsible water bags with a hose attachment that you drink from. The bags fit inside or outside your pack with the hose positioned over your shoulder so that you can access your water as you hike. Bladder bags can hold 1 - 3 liters of water.

**Trekking Poles:** Trekking poles are highly recommended for this trip. Trekking poles contribute to your safety by improving your balance and stability, and to your health by saving stress on your hips and knees. If you are not familiar with trekking poles, [click here to read this blog post](#) that addresses the most commonly asked questions.
